#### MORE EVOLUTION?

Professor Sherman reports the latest development in six cylinder motor cars—a tree-climbing Dodge. Near his home on Northwood Avenue there is a considerable grade, and one evening a confused driver in starting his car threw the engine into reverse. The result: a rapid descent was completed only after a sapling interceded. The young tree bent over, but swung back upward sufficiently to lift the rear wheels from the ground. The situation was handily solved only by applying an axe to the tree.
